Art Unit 1713

The rejection as set forth under 35 U.S.C. § 103 over Scholl et al. and the German document identified as Abele et al. are herein withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Trivette et al.

This patent teaches a method wherein the method step is that of mixing rubbers with a dialkyl polysulfide which is that as

identified in claim 4. See specifically column 2 lines 10+ as well as the Examples and claim 1. It is acknowledged that applicants' claims recite the language "for the mastication of rubbers" which is not identified within this patent. This patent identifies the method of mixing the dialkyl polysulfide compounds with the rubbers as being a method of inhibiting the prevulcanization of sulfur vulcanizable rubber containing compositions. The Examiner maintains that these are the same ingredients mixed by the same method. As such, the resulting properties from said method are presumed to be inherently possessed by the patent. As such, the claims are properly rejected under a 35 U.S.C. § 102/103 rejection following the In re Fitzgerald rationale. In re Fitzgerald et al. 619 F. 2d 67, 70, 205 USPQ 594, 596, (CCPA 1980).
